

## **Don't forget about your horse's mouth!**

Dear Clients,

We hope that you are enjoying the summer months with your horses! Remember, good dental care is extremely important to your horse's overall health and can sometimes be easily overlooked.

Parrott Equine has been providing excellent dental care for 27 years to our wonderful patients, including teeth filing. We recognize that there are several choices you have, including laymen horse teeth filers and other veterinarians.

Parrott equine wants you to know that we take pride in our exceptional work with competitively low prices and exceptional experience. We want your business because it is part of the whole horse that we care for. The advantage we have over the competition is that we know our patients whole body and every time we see your horse we add to that knowledge base of your horse. In addition, we always stand by the work that we perform.

Please consider us first when it is time to evaluate and care for your horse's mouth and overall wellness.

We thank you for your continued business!

Sincerely,

Bryan G. Parrott, DVM and the staff of Parrott Equine
